AWS Educate Customer Service

Zurich, 14 February 2019

Confirmation of employment as Lecturer at IAS ETH Zurich for Peter von Rohr

To whom it may concern

I hereby confirm that Peter von Rohr is employed as a lecturer at the Institute of Agricultural Sciences in the Department of Environmental Systems Science at ETH Zurich. Peter von Rohr teaches

- 751-6305-00L Livestock Breeding and Genomics in the Fall Semester and

- 751-7602-00L Applied Statistical Methods in Animal Sciences and 751-6212-00L Genetic Evaluation of Livestock in the Spring Semester.

All these courses are applied courses in the area of data science. For this types of courses it is especially important to get the students to work on practical exercises using a programming language and environment like R. To avoid the burden of having the students install all the required software locally on their private laptops, a central cloud-based installation on AWS would be of tremendous help. Furthermore, an AWS education grant allows the students to be introduced to a cloud based infrastructure.

Yours sincerely,

Bruno Studer
Head of the Institute
